ez COD™ Recycling

Hassle-free, economical COD disposal!

- **Low Cost**—Save up to 50% vs current disposal options
- **Hassle Free**—Place entire vial into receptacle
- **Environmentally Friendly**—Silver and Mercury are reclaimed
- **One Stop Shopping**—Order COD and recycling from one source

Introducing ez COD Recycling for Hach COD!

COD analysis exposes your facility to a potentially hazardous by-product. On-site storage of large quantities can be dangerous, while outside disposal services can be expensive. With Hach ez COD, your facility receives a DOT approved recycling container, prepared handling documents and pre-paid transportation to a recycling facility for easy and environmentally sound reagent reclamation. All at a fraction of what other services charge.

Prod. No. Description

- | | |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2895405 | 5 Gallon Program (Mail Back)
Includes 5 gallon container, documentation and transportation to the recycling facility. 5 gallon holds approximately 400 16 mm COD vials or 650 13 mm TNTplus vials. (Maximum total weight of 25 lbs.) |
| 2895405P | 5 Gallon Program (Pick Up)
Includes same items as the Mail Back Program above. |
| 2895420 | 20 Gallon Program
Includes 20 gallon container, documentation and transportation to the recycling facility. 20 gallon holds approximately 1,600 16 mm COD vials or 2,600 13 mm TNTplus vials. |
| 2895455 | 55 Gallon Program
Includes 55 gallon container, documentation and transportation to the recycling facility. 55 gallon holds approximately 4,400 16mm COD vials or 7,150 TNTplus vials. |

Not to be used for disposal of mercury-free product. Bucket must contain mercury-based COD products to qualify. For continental U.S. domestic customers only—not for Alaska and Hawaii. Hazardous waste holding periods may apply. Check with your regulatory specialist.

An alternative “green” method for determining COD.

- Eliminates heavy metals from your waste stream
- Minimizes or completely eliminates disposal costs

- Proven as a fast and reliable alternative to BOD for process control
- Optional Chloride Removal System—up to 1,000 mg/L Chloride
- Shows good correlation to BOD and COD (dichromate) methods

Dissolved Oxygen, Luminescent

Parameters

- No membranes to clean or replace
- Low maintenance
- No polarization time
- Rapid response
- 99% accuracy

See Hach LDO® and other innovative Hach electrochemical products on pages 21-54.

EDTA

See Chelant on page 143.

Erythorbic Acid

See Oxygen Scavengers on page 178.

Fluoride

Hach's SPADNS Fluoride tests for the simplicity & reliability you expect.

- Available in multiple reagent platforms (AccuVac® and bulk solution)
- Easy-to-use one reagent test
- EPA accepted, distillation required for reporting purposes
- Hach method can analyze samples with up to 5 mg/L chlorine with no interference

NEW! ARSENIC-FREE SPADNS 2 Reagent!

- Removes chlorine interference without sodium arsenite
- Simplify waste disposal and minimize potential exposure
- Use as a direct replacement for SPADNS Reagent Solution or AccuVacs. SPADNS 2 Reagents can be used with existing Fluoride procedures.

- Determine Magnesium by difference: Magnesium is the difference between Total Hardness and Calcium
- Multiple titration and colorimetric methods available
- A wide variety of reagent platforms available
- Calcium hardness methods (CalVer2) are highly sensitive and have sharp end points for accurate results. See Calcium Hardness, p.141-142.

- Total hardness methods (Calmagite) are formulated for enhanced stability and are free from most interferences
- Ultra low range method (Chlorophosphonazo) developed specifically to be used with Hach spectrophotometers for ultrapure and boiler feed water analysis

Hydrazine

- Easy-to-use one reagent test
- Concentration ranges ideal for boiler water analysis
- Easy AccuVac® configuration for limiting oxygen exposure of sample

Reagents

Description	Method	Platform	Range	Instrument*	# Tests	Product Number
HydraVer 2 Hydrazine Reagent, 100 mL	8141	S	4-600 µg/L N ₂ H ₄	All except DR/850, DR/820, PC II	100	179032
HydraVer 2 Hydrazine Reagent, 500 mL	8141	S	4-600 µg/L N ₂ H ₄	All except DR/850, DR/820, PC II	100	179049
HydraVer 2 Hydrazine Reagent, 1 L	8141	S	4-600 µg/L N ₂ H ₄	All except DR/850, DR/820, PC II	100	179053
Hydrazine Reagent AccuVac Ampules	8141	AV	4-600 µg/L N ₂ H ₄	All except PC II	25	2524025

Test Kits

Description	Platform	Range	# Tests	Product Number
Hydrazine Test Kit (Model HY-2)	CD	0.02-1.00 mg/L N ₂ H ₄	300 [†]	184900

[†]Reagents are supplied for 300 tests; enough DI water for 50 tests.

For on-line measurement of oxygen scavenger/hydrazine, see page 433.

Hydrogen Peroxide

- Simple drop count titration provides quantitative measurement

Test Kits

Description	Platform	Range	# Tests	Product Number
Hydrogen Peroxide Test Kit (Model HYP-1)	DCT	0.2-2.0 mg/L; 1-10 mg/L H ₂ O ₂	100	2291700

Hydrogen Sulfide

Also see Sulfide on page 190.

Test Kits

Description	Platform	Range	# Tests	Product Number
Hydrogen Sulfide Test Kit (Model HS-C) Effervescence of H ₂ S	CC	0-5 mg/L H ₂ S (0.0, 0.1, 0.3, 0.5, 0.7, 1.0, 2.0, 5.0 steps)	18	2537800
Hydrogen Sulfide Test Kit (Model HS-WR) Methylene blue	CD	0.01-0.55 mg/L S ²⁻ (0.01 smallest increment)	60	223801
		0.5-2.25 mg/L S ²⁻ (0.5 smallest increment)	60	
		2.5-11.25 mg/L S ²⁻ (2.5 smallest increment)	30	

Hydroquinone

See Oxygen Scavengers, page 178.

*Generally, the DR 5000 performs the same methods as the DR/4000. The DR 2800 performs the same methods as the DR 2700, DR/2500, and DR/2400. Some exceptions do exist.

Hypochlorite / Bleach Solutions

- Measure activity of hypochlorite-based disinfectants
- Digital Titrator or Drop Count kits provide a choice of methods

- Portable system allows determinations in the field or in the lab

Reagents

Description	Method	Platform	Range	# Tests	Product Number

An Understanding of Iron—Its Forms and Analysis Methods

Hach Company offers the following guidance for selecting the right iron method for your application.

Ferrous Iron Reagent

Determines iron in the ferrous (Fe²⁺) form. Digestion or other sample pretreatment may cause ferrous iron to be lost.

FerroVer® Iron Reagent

For determination of total soluble iron including all ferric (Fe³⁺) and ferrous iron (Fe²⁺) as well as complexed iron compounds (Fe-EDTA). EPA approved for reporting total iron when an acid digestion is used. Total FerroVer – Ferrous Iron = Ferric Iron. Perfect for many applications and a wide range of concentrations. Determines iron in the presence of copper.

TPTZ Iron Reagent

More sensitive than FerroVer. Not EPA accepted.

FerroZine™ Iron Reagent

Determines soluble ferric (Fe³⁺) and ferrous (Fe²⁺) iron. Digestion is needed for strongly chelated iron complexes (such as those with EDTA) and Total Iron. Use where trace level iron analysis is required.

FerroMo™ Iron Reagent

Determines iron in the presence of molybdenum compounds in cooling tower waters. Eliminates the reduction of molybdenum which forms a black solution. No pretreatment necessary. Available as a two-powder pillow reagent system.

Iron Titration Method

Determines high levels of soluble ferrous (Fe²⁺) and ferric (Fe³⁺) iron in industrial or oil field applications, usually without any sample pretreatment. Uses three unit-dose powder reagents and a Digital Titrator titration cartridge.

With Hach iron methods you have the assurance that you have the right test, no matter what the application.

- Complete product offering for a wide range of applications
- EPA-approved FerroVer®

- FerroZine™ used for trace levels of iron
- Multiple reagent platforms

(1) HgEx™ Reagent A Stannous Sulfate Solution, 20 mL Ampules		S			25	2658825
(1) HgEx™ Reagent B Sulfuric Acid Standard Solution, 500 mL		S			25	2658949
(1) HgEx™ Reagent C Sodium Hypochlorite Solution, 55 mL		S			25	2659059
(1) HgEx™ Reagent 3 Alkaline Powder Pillows		PP			25	2658448
(1) HgEx™ Reagent 4 Indicator Powder Pillows		PP			25	2658548
(1) HgEx™ Reagent 5 Hydroxide Solution, 10 mL		S			25	2658636
(1) HgEx™ Reagent 6 Complexing Powder Pillows		PP			25	2658748
(2) Mercury Scrubber						2655800

Set requires Cold Vapor Mercury Apparatus Set and other accessories (see below).

Standards

Description	Volume	Concentration	Product Number
Mercury Standard Solution	100 mL	1,000 mg/L Hg	1419542

Accessories Required to Run Tests

Description	Product Number
Cold Vapor Mercury Apparatus Set	2674400
Vacuum Pump, with fittings, 115 V	2824800
Vacuum Pump, with fittings, 220 V	2824802
Thermometer	2635700

See *Procedure* for a complete list of required accessories.

Microbiology

See pages 227-248.

*Generally, the DR 5000 performs the same methods as the DR/4000. The DR 2800 performs the same methods as the DR 2700, DR/2500, and DR/2400. Some exceptions do exist.

PLATFORM KEY: AV=AccuVac®; CC=Color Cube; CD=Color Disc; DCT=Drop Count Titration; DT=Digital Titrator; EX=Extraction; IA=Immunoassay; PCL=Pocket Colorimeter™ II; PP=Powder Pillows; RL=Rapid Liquid; S=Solution; SP=Solution Pillow; SW=SwiftTest™; TNT=Test 'N Tube™; TNT+=TNTplus™; TRB=Turbidity; TS=Test Strip

- Choice of ranges and methods to meet testing needs, lab and portable methods available

- Two reagent platforms
- Low range ternary complex method is specifically designed for boiler and cooling water

Reagents

Test Kits

Description	Method	Platform	Range		# Tests	Product Number
Pocket Colorimeter™ II – Molybdate	8169	PCII, PP	0.02-3.00 / 0.1-12.0 mg/L Mo	Kit includes PC II	100	5870010
Molybdenum Test Kit (Model MO-LR)		CD	0.1-3.0 mg/L Mo		100	2359300
Molybdenum Test Kit (Model MO-2)		CD	0.2-10.0/ 1-50 mg/L Mo		100	1419301
Molybdenum Reagent Set (for MO-2)		PP	0.2-10.0/ 1-50 mg/L Mo		100	2243400

Standards

Description	Volume	Concentration	Product Number
Molybdenum Standard Solution	100 mL	10 mg/L Mo ⁶⁺	1418742
Molybdenum Standard Solution	100 mL	1,000 mg/L Mo ⁶⁺	1418642

Monochloramine

- Measure monochloramine without interferences from other chlorine species

- Control your chloramination facility by pairing with the new Free Ammonia test

- 5 minute test

Reagents

Description	Method	Platform	Range	Instrument*	# Tests	Product Number
Monochloramine Powder Pillows	10171	PP	0.04-4.50 mg/L Cl ₂	All except DR/820	50	2802246
Monochloramine Reagent Set, HR	10172	TNT	0.1-10.0 mg/L Cl ₂	All except DR/800, PC II	25-50 [†]	2805145

[†]Dependent on the number of performed reagent blanks.

Continued on next page.

For on-line monochloramine measurement, see page 428.

*Generally, the DR 5000 performs the same methods as the DR/4000. The DR 2800 performs the same methods as the DR 2700, DR/2500, and DR/2400. Some exceptions do exist.

Monochloramine

Test Kits

Description	Method	Platform	Range	Instrument*	# Tests	Product Number
Pocket Colorimeter™ II Test Kit – Free Ammonia & Monochloramine	10171	PC II, PP, S	0.02-0.50 mg/L NH ₃ -N 0.04-4.50 mg/L Cl ₂	Kit includes PC II	50	5870026 Free Ammonia or 100 Monochloramine
Nitrification Control Kit Contains tests for:		PP, S		Kit includes DR/890		2882200
Free Ammonia			0.02-0.50 mg/L NH ₃ -N		50	
Monochloramine			0.04-4.50 mg/L Cl ₂		100	
Nitrite			0-0.350 mg/L NO ₂ ⁻ -N		100	
Total Chlorine, LR			0-2.00 mg/L Cl ₂		100	
Total Chlorine, HR			0.1-10.0 mg/L Cl ₂		100	

Standards

Description	Volume	Concentration	Product Number
Monochloramine/Free Ammonia Spec✓ Secondary Standard Kit	Set of 4 vials	0.04 – 4.50 mg/L Cl ₂ 0.01 – 0.50 mg/L NH ₃ -N	2507500

**To control drinking water distribution systems, see
Free Ammonia on pages 135-136,
Nitrite on page 175, and
Trihalomethanes on pages 195-196.**

Nickel

- *Heptoxime method—EPA approved for wastewater analysis (digestion required for reporting purposes)*
- *NEW for high range—TNTplus (Prod. No. TNT856) barcoded vials for automatic method detection*
- *PAN method—Hach's lowest range Nickel test—a quick and easy method*
- *PAN method measures Nickel and Cobalt on the same sample (with a spectrophotometer)*
